What's New in the?

4.0 Inferno is an advanced, interactive and all-in-one music player for all categories of musicians, from beginners to professional DJs. Inferno is a unique cross-between a music library, a jukebox, a player and a visualizer. It combines a universal library, customizable skins, a picture based visualization and support for all audio formats. Infunno is an mp3/WAV player with Live Mix, Sequencer and effects. The program comes with a wide variety of skins to play your music in the most popular music styles. Enter the disc library and select your favorite album or artist from the database. Use the built in advanced searching tool to find the music you want to play instantly. You can make changes to the track, artist and album information by using the visualizer, browse your music while listening or use the ajax tag editor to add or remove additional info. Your disc library can be saved as a playlist to play later. Enjoy the music, ajax functions, effects and the database you built by using the intuitive visualizer. You can view song information, click on the picture of the artist/band and access detailed song information. It is a useful little tool that sits in your computer tray and you can use it with all your favorite players. You can use one of the many skins offered with the program, or make your own skin to create your own musical persona. Features Performance Search: This unique feature allows you to search the entire database for songs, artists, albums and genres. Fire up a group of searches at once by using the search boxes in the main window or a list of tags. You can select multiple groupings of songs by using the search boxes and they will all fire at once. You can also put the search into a user defined mode. Just enter a phrase or words in the box below the search line and a new grouping will be added. Once you have a pattern of songs you want to find, just enter that into the Search line. Tag Editor: To add or edit tags in the database, simply double click on the pictures of the songs on the right and use the tags on the right to edit the picture Visualizer: Inferno's unique visualizer is a cross between a jukebox and visualizer. You can view artist and album information, click on the picture of the band and access detailed song information. Inferno is an advanced, interactive and all-in-one music player for all

System Requirements For DJ2000:

The system requirements below are based on the minimum requirements to play World of Warcraft and assume you have appropriate hardware to meet those requirements. When installing or uninstalling any game, you should always refer to the game's minimum requirements to ensure you can install and play the game. Minimum: OS: Windows 7 or later, Mac OS X 10.9 or later, and Linux OS (Ubuntu 14.04 or later recommended) Processor: Intel Core 2 Duo or later Memory: 2 GB RAM Graphics: OpenGL 2
