Q: UIViewController + Custom UITableViewCell, set content view's frame I have created a custom UITableViewCell class which contains buttons and text view. The text view has a fixed frame of (200,410). Then I

created a UIViewController which contains a custom UITableView. The cell has prototype set as my custom UITableViewCell class. The frame of the UITableView is (0,0,320,460). How can I set the frame of the UITableView so it doesn't cover the buttons? A: Try this. Use clipsToBounds property, to restrict the tableview to the view bounds. `tableView.clipsToBounds = true;`

The commission, before which arguments were addressed by all parties and lawyers, finally, after an extended hearing, held the results as reported by the Election Commission. The commission held that in the June 1990 assembly poll, the Congress polled a clear majority. The only difficulty that arose was the governor had appointed Rajaratnam Gowda from the state Congress party, and therefore
