What if people were content to watch content/engage with content on TV in more passive ways?The present invention relates to a metal can body manufacturing apparatus and a method of manufacturing metal cans. A method of manufacturing a variety of can bodies is known wherein a flat hollowed liner used to constitute a can body is subjected to roll forming or drawing and then to arc forming wherein the hollowed liner is drawn and formed into a can body. In this case, the hollowed liner is set to a can body forming apparatus which is constituted by a circular liner can forming unit which comprises a drawing unit formed with a rotating drawing die which is provided with a ring gear and a pair of cutting rollers rotated by the rotation of the ring gear, a lifting and lowering mechanism which is arranged between the drawing unit and the inner surface of the hollowed liner and which is formed with a lift plate and a push plate which are urged toward each other to move the hollowed liner upward and downward along the inner surface of the hollowed liner, and a fitting plate provided on the outside of the hollowed liner and which receives a lower edge of a can body formed by the hollowed liner. In this can body forming apparatus, when the hollowed liner is pulled upward by the lifting and lowering mechanism formed with the lift plate, the push plate is pushed downward against the lower
