## AutoCAD Free [Latest]

In January 2019, Autodesk discontinued the AutoCAD 2020 subscription model, and renamed their products as “AutoCAD and AutoCAD LT,” thus the “2020” application no longer exists. The documents on this site are for AutoCAD and AutoCAD LT Version 2017 and earlier. For AutoCAD or AutoCAD LT document formats,

---

please refer to the software version's documentation or learn more about AutoCAD. It is possible to use the current, 2018 version of AutoCAD and AutoCAD LT on Windows 7 (32 or 64-bit) or Windows 10 (32 or 64-bit), but please note that AutoCAD and AutoCAD LT 2018 do not support Windows 10 Anniversary Update, Windows 10 build

---

1607 (16.7) and any version of Windows 10 that is later than 10 build 1607. AutoCAD and AutoCAD LT are available in many editions, versions and languages. If you want to know more about AutoCAD, its available editions and the differences between them, see the [AutoCAD 2020 Editions and Versions](#) article. For those seeking a structured

---

way to learn how to use AutoCAD, we recommend the freely available book, **AutoCAD Fundamentals** by Chris Lindig. If you are new to CAD and drafting, the standard way to learn is to get an account with one of the many CAD software training centers and then follow their training. But if you prefer to learn on your own,

---

there is a good online resource. Autodesk offers a free, online tutorial for beginners. Autodesk's Mac AutoCAD Help and AutoCAD LT Help provide an extensive set of online tutorials on the products. In this article, we'll take a quick tour of what AutoCAD is, including some history and future trends. A Quick Tour of AutoCAD

was first introduced in 1982 and, since then, has been an important part of Autodesk's comprehensive 3D computer-aided design (CAD) software suite. Introduced in 1982 and originally intended as an internal drafting program, AutoCAD quickly became a competitor to AutoCAD LT (line) as well as CAD systems such as Computer Aided Drafting (CAD)

software application. AutoCAD LT is no longer available on Autodesk's website. AutoCAD LT was no longer under active development and was discontinued on September 14, 2017. AutoCAD Architecture AutoCAD Architecture is an architecture-centric design software for civil engineering. Its main purpose is to design all aspects of the civil

engineering project, including infrastructure, building, and other non-structural aspects. However, it also contains the standard building design functionalities found in the normal AutoCAD civil design software. AutoCAD Architecture was initially released in 2006 with AutoCAD 2009. In 2009, Autodesk released AutoCAD Architecture

2D, a completely new user interface. Since 2016, the standard AutoCAD 2D design interface is called "AutoCAD Architecture".

Drawings created in AutoCAD Architecture are versioned and can be changed, so that the drawing always appears consistent with the design intent.

Unified Design

Develop complete infrastructure and building designs in one integrated design environment. Can be used to design any infrastructure and building projects,

functions. Version 2.2 Fixed the Stencil To Shape feature so it is ready to use. Version 2.1 Fixed most of the bugs. Version 2.0 Removed the registration of the user and added some new options. Version 1.3 Added Time and Toolbars support. Version 1.2 Added a feature to open multiple files at the same time and one feature to export a

---

PDF document.

**Version 1.1** This release contains an updated feature to export all selected drawing features to a PDF document. The PDF document is automatically created in the same folder as the CAD file.

**Version 1.0** This version contains an updated feature to export all selected drawing features to a JPG/PNG image. The JPG/PNG

---

image is automatically created in the same folder as the CAD file. A bug has also been fixed to save the layer and color settings when exporting a drawing to JPG/PNG. Autodesk Infocad 2.0 is required to work with this version. Version 0.9 Removed the name parameter from the export code and added an error message if the file name cannot be

created. Version 0.8  
Fixed the import.  
Version 0.7 Improved  
error handling. Version  
0.6 Fixed some  
possible problems.  
Version 0.5 Fixed a  
possible problem with  
drawing features.  
Version 0.4 Improved  
the error handling  
when creating the  
registration key.  
Version 0.3 The error  
message has been  
improved. Version 0.2
